

❖ Energy Recovery System (ERS)

❖ Product Description:

Energy Recovery System (ERS) is newly, first time Designed and upgraded version of MVRE Technology which has the unique features of zero maintenance and consistence performance having the lowest operating cost ever. The Patent Application has been filed for this product. ERS is specially designed for those clients who do not have steam as heating media and want to achieve minimum of operating cost with Zero Carbon Foot Print. Key features of ERS System is as below.

❖ Key Features:

- Patent (Applied) Technology
- Zero Carbon Foot Print
- Run on Only Electrical Energy Only
- Hybrid Model Also Available
- Lowest in Operating Cost
- No Maintenance due to Static Design
- Consistence Performance
- Mobile/Portable system
- Pre-Assembled and Pre-Tested System
- Compact Design
- Lowest Foot Print
- Easy to transport
- No Site cost (Except Utilities)
- Plug & Play System
- Saves Project Duration as well as Money
- Range: - 1KLD to 20KLD
- MOC: SS-304, SS-316, Titanium and Customized
